

Ekinops' SixSq announces three new App vendors in Nuvla Marketplace

Geneva, 27 June 2023. Ekinops (Euronext Paris - FR0011466069 – EKI), a leading network access and virtualization specialist, today announced an additional three new application vendors joining their Nuvla Marketplace of business applications, built by SixSq to accelerate the delivery and monetization of edge computing solutions.

SixSq's Nuvla is a proven B2B digital platform for industrialization and automation of containerized edge applications and device management. Nuvla enables, among other things, the deployment of these applications on the Ekinops OneAccess branded network equipment through OneOS6 middleware.

The latest innovative vendors selected to join the [Nuvla App Vendor Programme](#) are:

- [Varnish Software](#): Powerful caching and content delivery solutions.
- [LatenceTech](#): Monitor and predict network low latency in real-time.
- [Relimetrics](#): AI-based quality audit and process controls for manufacturing.

Customers from any business sector can easily procure, deploy and manage these cutting-edge apps using the [Nuvla marketplace](#), either individually or in combination with any of the apps in the marketplace. The benefits include data sovereignty, cost savings and improved business continuity.

The Nuvla marketplace gives app vendors and customers tools to interact in a seamless way, including clear pricing and contractual terms. App vendors wishing to join the App Vendor Programme to have their apps published on the Nuvla marketplace are invited to get in touch with the SixSq team.

About SixSq

SixSq is a leader in edge computing B2B SaaS. The team is based in Geneva, Switzerland, and embraces the Swiss ideals of excellence, innovation and precision. Nuvla, the company's edge-to-cloud B2B management platform and marketplace, allows customers to deploy a

secure and comprehensive edge and cloud strategy, while avoiding lock-in. The NuvlaEdge software turns any x86 or ARM hardware platform into a smart edge device connected to Nuvla to deploy applications in a range of sectors. The result is a secure edge-to-cloud solution that is application centric, hardware agnostic, cloud neutral and container native.

SixSq is part of the Ekinops group, a leading network equipment and solutions provider.

About EKINOPS

Ekinops is a leading provider of open, trusted and innovative network connectivity solutions to service providers around the world. Our programmable and highly scalable solutions enable the fast, flexible, and cost-effective deployment of new services for both high-speed, high-capacity optical transport as well as virtualization-enabled managed enterprise services. Our product portfolio consists of three highly complementary product and service sets: EKINOPS360, OneAccess and Compose.

- EKINOPS360 provides optical transport solutions for metro, regional and long-distance networks with WDM for high-capacity point-to-point, ring, and optical mesh architectures, and OTN for improved bandwidth utilization and efficient multi-service aggregation.
- OneAccess offers a wide choice of physical and virtualized deployment options for Layer 2 and Layer 3 access network functions.

Compose supports service providers in making their networks software-defined with a variety of software management tools and services, including the scalable SD-WAN Xpress and SixSq Edge-to-Cloud solutions.

As service providers embrace SDN and NFV deployment models, Ekinops enables future-proofed deployment today, enabling operators to seamlessly migrate to an open, virtualized delivery model at a time of their choosing.

A global organization, Ekinops (EKI) - a public company traded on the Euronext Paris exchange operates on four continents.
